

Capstone Project Final Presentation

By: Riddhi Mehta (J030)

Portfolio Management for Short-Term Investment

1. Motivation
2. **Phase I** – Sentiment Analysis
3. **Phase 2** – Price Prediction Model
4. **Phase 3** – Two-Phase Integration
5. Future Scope (& Product)

Motivation

1

External

1. Nationwide survey of over 60,000 households reveal “Indians are wise savers but poor investors” [1]
2. 9 reasons have been discovered that why Indians hesitate to invest in the stock market [2]

Survey Form – 200 respondents

- Questions focused on understanding the mindset of respondents towards stock market investment
- It was asked that if investing was made easier and transparent, would then the option be considered?

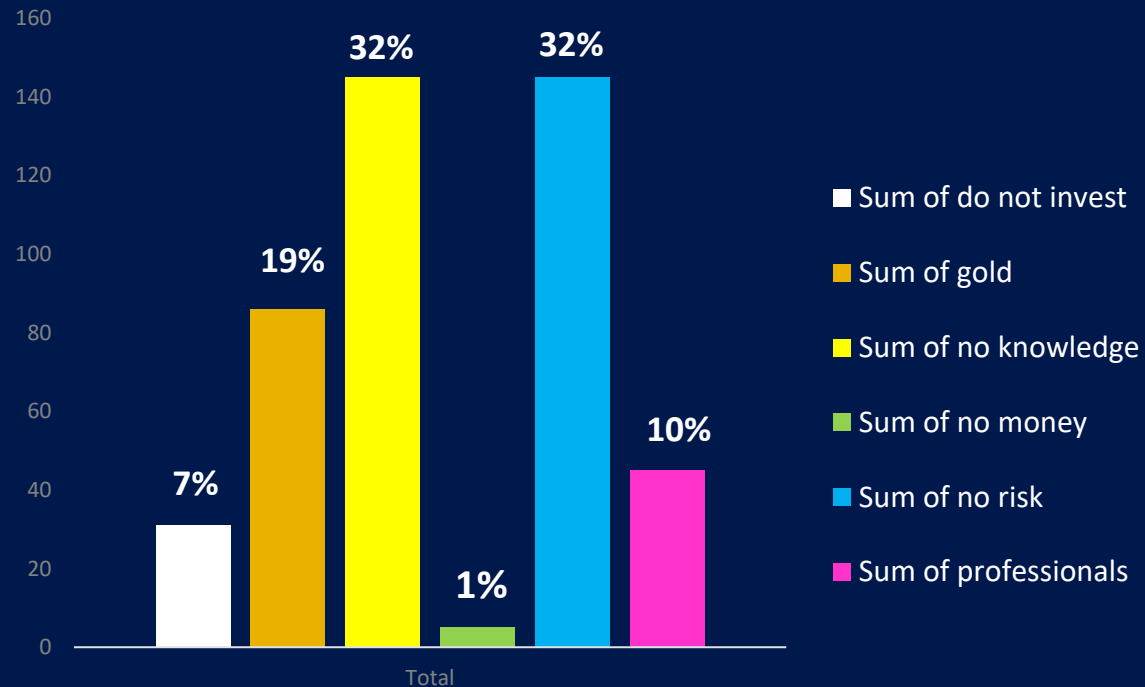

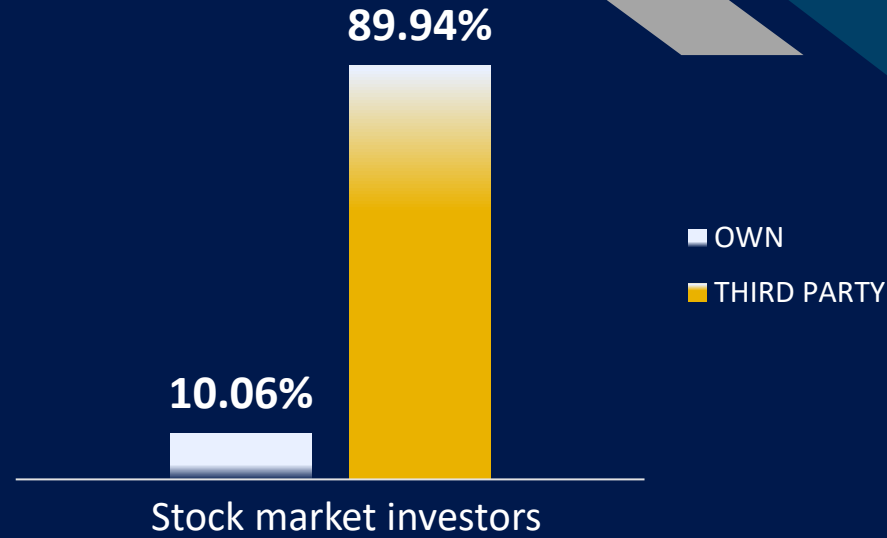

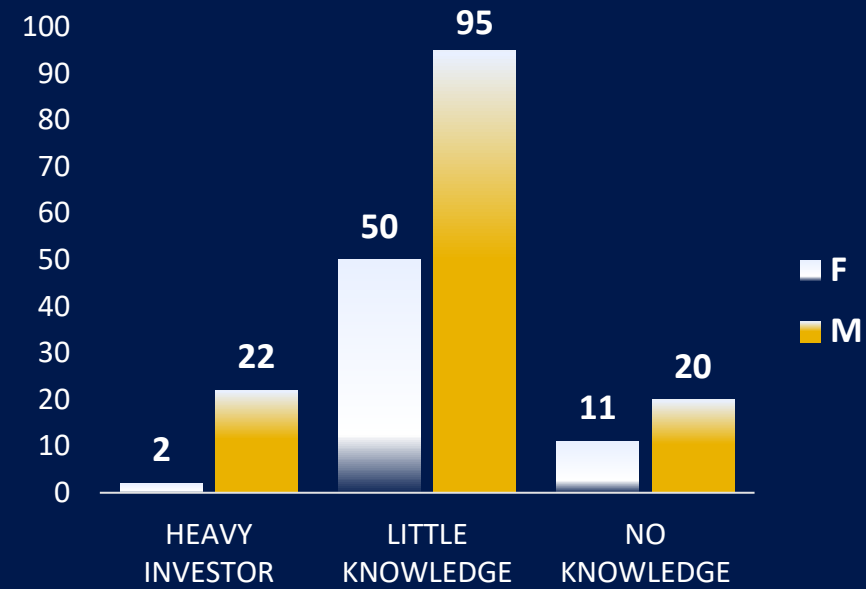

2

Internal

[1] Shukla, Rajesh. (2008). Indians are wise savers but poor investors: Survey. 10.13140/RG.2.2.10738.56006.

[2] <https://tradebrains.in/reasons-why-most-indians-do-not-invest-in-stocks/>

SURVEY ANALYSIS

- 88% of respondents had little or no knowledge regarding the stock market
- ~90% of the ones who invest had a third party agent handle their portfolio
- ~50% of the respondents believe that the stock market has a lot of risk and the safer option is to invest in gold or land or fixed deposits
- ~77% respondents would prefer a system that would suggest best portfolio based on their requirements
- ~98% of respondents who prefer the above system would then start investing on their own

Phase I - Sentiment Analysis

IN – BUILT LIBRARY	NOVEL LOGIC
<u>Extraction of News</u> GoogleNews	<u>Intensity Threshold</u> 0.7 to 0.5
<u>Sentiment Analysis</u> Valence Aware Dictionary for Sentiment Reasoning (VADER)	<u>Positive : Negative Offset</u> Negative news given three times as much as importance as Positive News
	<u>Overall Stock Sentiment</u> Computation of total positive value and total negative value to decide whether to buy or sell or hold stock
	<u>Exception Handling</u> <ul style="list-style-type: none">- Handles if no news is extracted- Handles if the news is not intense

1

```

: 1 googlenews = GoogleNews(lang = 'en', period='50d', encode='utf-8')
  2 googlenews.get_news("Reliance Industries Ltd. stock buy or sell?")
  3 googlenews.get_texts()

: ['Analysts see the tide turning for Reliance Industries stock',
  'Stocks in Focus on March 30: Nazara Technologies, MMTC, NMDC, Reliance
  'RIL to sell stakes in Den, Hathway through OFS',
  'RIL to sell Den Networks and Hathway stakes for ₹1,122 crore',
  'Buzzing Stocks | RIL, Laxmi Organic and others that will be in focus t
  'Stock in news: Reliance, Airtel, ONGC, Hero MotoCorp, Rail Vikas Nigam
  'How will the Reliance stock move going forward',
  'Reliance opts for control in Den and Hathway, instead of full ownershi
  'Stocks to Watch: RIL, Tata, Edelweiss, DLF, Power Grid, Welspun',
  'Markets likely to be rangebound; Sun Pharma, Lupin, RIL in focus',
  'Zerodha users lose Rs 10 cr in lapsed Rights Entitlements since RIL is
  'Markets likely to be ranged; Reliance, Future, Vodafone in focus',
  'Market HIGHLIGHTS: Sensex rallies over 1,100 pts, Nifty ends at 15,245
  'Stocks in focus: RIL, Future Retail, NTPC, TCS, HDFC Bank, IDBI Bank,
  'Why Future Retail shares hit 10% lower circuit in opening trade',
  'Stocks to Watch: Future Group, RIL, Airtel, auto companies, insurance
  'Top buy and sell ideas by Mitessh Thakkar, Yogesh Mehta for short term
  'Markets may continue to see sell off: Future group, Bharti, auto stock

Phase II – Price Prediction

IN – BUILT LIBRARY	NOVEL LOGIC
<u>Basic Prediction Model(s)</u> <ul style="list-style-type: none">- Moving Average- Auto-Regressive Integrated Moving Average (ARIMA)- Long Short-Term Memory Neural Network (LSTM)	<u>Parameter-Tuned Prediction Model(s)</u> <ul style="list-style-type: none">- ARIMA- LSTM <u>Future Price Prediction</u> <p>ARIMA and LSTM both were customised to predict on loop for 20 future days</p> <u>Best of Both Worlds</u> <p>Average of the predictions of ARIMA and LSTM resulted in the least RMSE*</p>

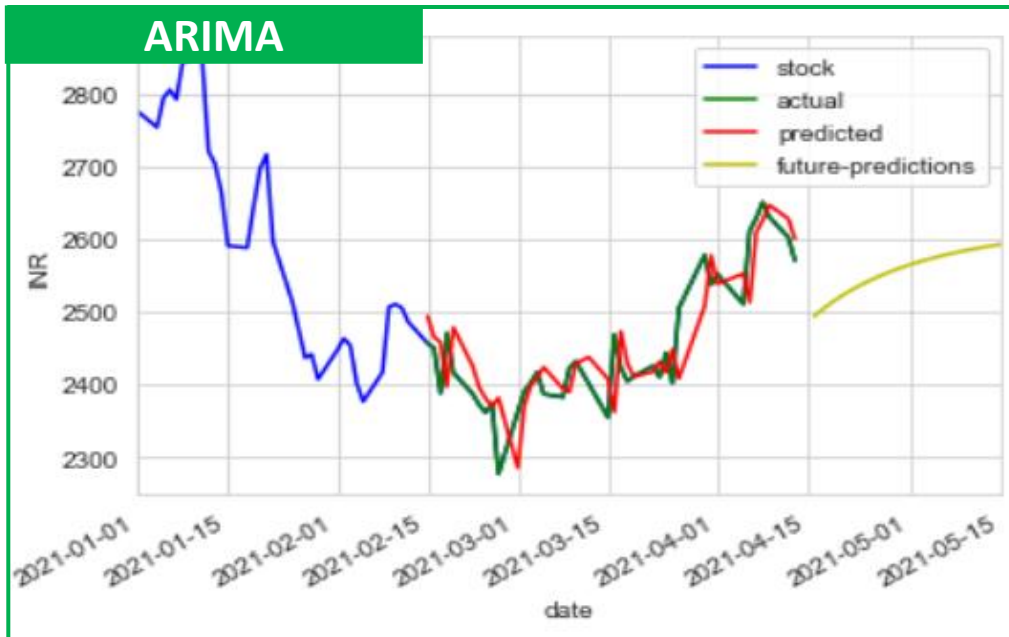

*Least RMSE is applicable for only selected stocks

MOVING AVERAGE

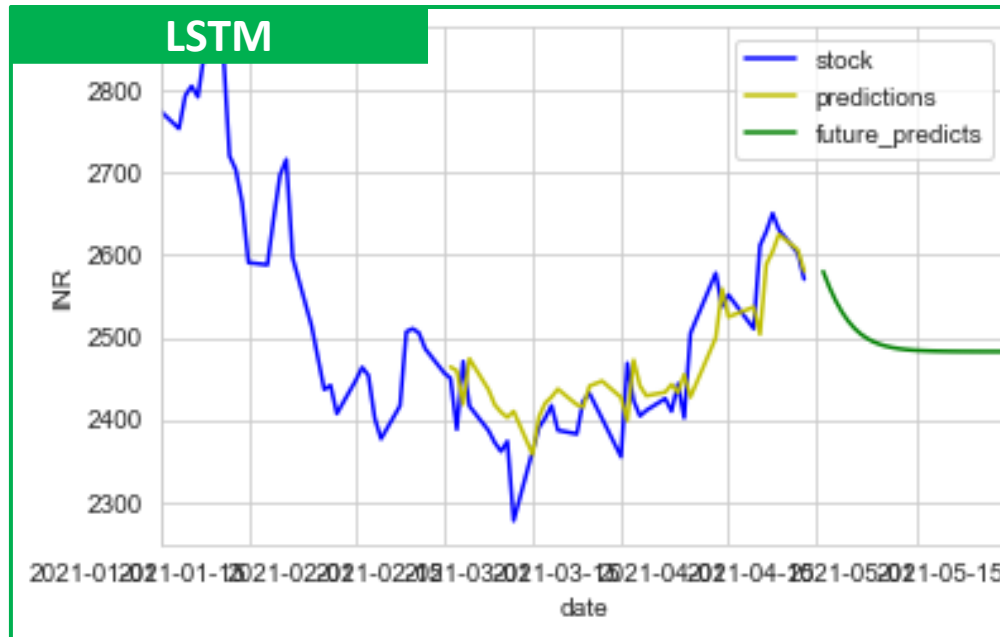

- After multiple predictions, the average is over the same values
- Hence, **straight line**

ARIMA

LSTM

- Selecting ARIMA and LSTM for further algorithm development

Phase II – Price Prediction – NOVELTY *explained*

Def (arima):

Def(arima_model):

In-built arima
prediction model

Def(evaluate_arima):

Runs arima_model for
different order
parameter in given
range options

Def(future_arima):

Uses the best order
from evaluate_arima
to predict price on
loop for 20 days

Def (lstm):

for i range (time_steps):

Runs lstm and exits when
the best time_steps value is
chosen

Uses the best time_steps value
to predict price on loop for 20
days

Def (best_of_two):

Rmse(arima)

Rmse(lstm)

Average = (predictions of arima
+ predictions of lstm) / 2

Rmse(Average)

Minimum(**Rmse**(arima),
Rmse(lstm),
Rmse(Average))

Chooses the best prediction

Phase II – Price Prediction – NOVELTY *explained*

Def (best_of_two):

Rmse(arima)

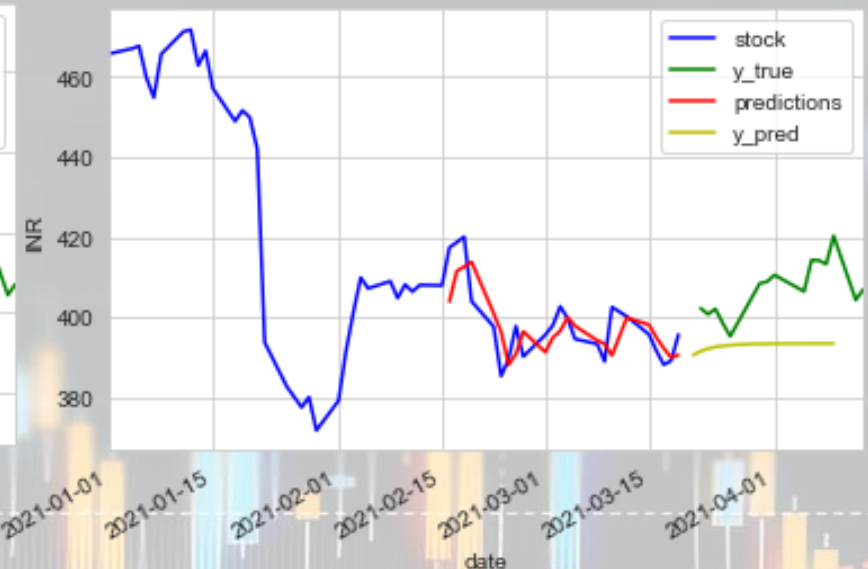

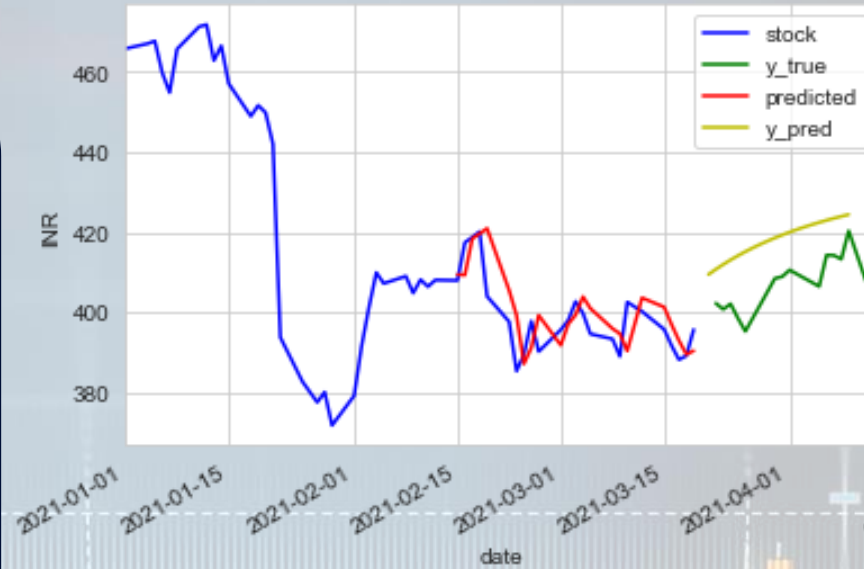

Rmse(lstm)

Average = (predictions of arima
+ predictions of lstm) / 2

Rmse(Average)

**Minimum(Rmse(arima),
Rmse(lstm),
Rmse(Average))**

Chooses the best prediction

	Date	ARIMA	LSTM	Average	Close
0	2021-03-22	410.724635	391.546387	401.135511	402.250000
1	2021-03-23	411.933377	392.173553	402.053465	400.750000

12	2021-04-09	424.373730	393.449036	408.911383	420.299988
ARIMA RMSE = 11.774855716168751					
LSTM RMSE = 15.743789976604665					
AVERAGE RMSE = 5.237709437899048					

Phase III – Two-Phase Integration

... is in itself a novel idea!

The motivation to integrate the sentiment analysis output with the price prediction model is illustrated below.

ARIMA

LSTM

100 RBLBANK

RBL Bank Ltd.

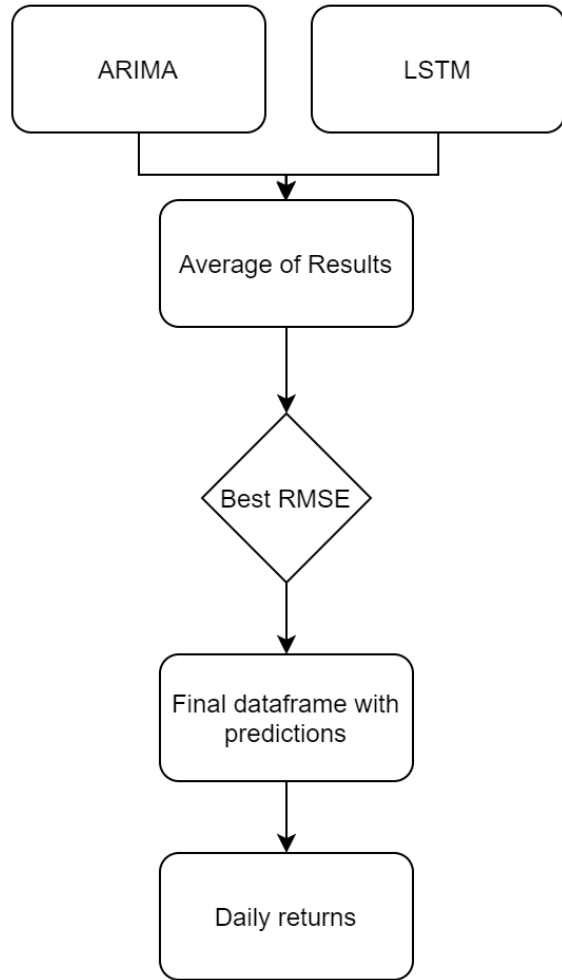

FINANCIAL SERVICES

Sell

PHASE 1

PHASE 2

TWO-PHASE INTEGRATION ALGORITHM LOGIC

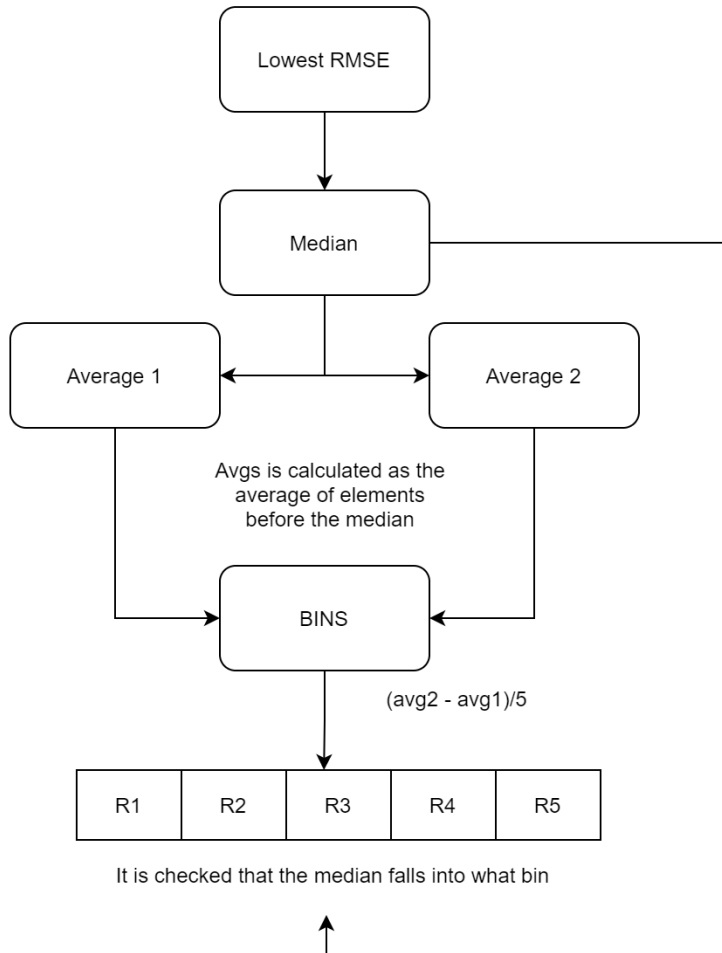

Sentiment Analysis

Output is either (1) Buy (2) Sell (3) Hold
(4) No concrete analysis could be done

	+ve daily returns	-ve daily returns
Buy	90% confidence	my-function
Hold	70% confidence	70% confidence
Sell	my-function	90% confidence

FINAL OUTPUT

my-function – deeper understanding

12	12.4	12.8	13.2	14	14.8	16	18	19	20
----	------	------	------	----	------	----	----	----	----

Median	14.4
Avg 1	12.88
Avg 2	17.56
Bin size	0.936

10%	30%	50%	70%	90%
13.816	14.752	15.688	16.624	17.56

Sentiment = Sell ; Returns = Positive

Inference - Price Prediction is stronger than Sentiment

8	10	14	18	22	22	22	23	29	30
---	----	----	----	----	----	----	----	----	----

Median	22
Avg 1	14.4
Avg 2	25.2
Bin size	2.16

10%	30%	50%	70%	90%
16.56	18.72	20.88	23.04	25.2

Sentiment = Sell ; Returns = Positive

Inference - Sentiment is stronger than Price Prediction

FUTURE SCOPE (& PRODUCT)

Concept:

Industry	Dropdown
Risk	High, Medium
Duration	1,2,3 months
Amount to Invest	Input by User
Benchmark Index	Nifty50 / NiftyMidCap50
Exposure	Large, Mid, Small Cap

For Example:

Industry	IT
Risk	High
Duration	2 months
Amount to Invest	16000
Benchmark Index	Any
Exposure	Any

Portfolio

Company	Weight	No of Stock	Value Invested
TCS	20.4%	1	3220
INFY	16.4%	2	2596
LTI	26.8%	1	4240
Persistent	20.1%	2	3180
Birlasoft	16.3%	10	2570
Total Portfolio Value	100%		15806

Market Cap Distribution

Return Expected: 9%
Confidence Probability: 85%
